## Technical specifications

The HAMILTON-C1 neo is a versatile ventilator that combines invasive and noninvasive modes\* with additional options of nCPAP and high flow oxygen therapy. The integrated turbine allows it to be operated independently of a compressed air supply. Due to its compact design, it is an ideal companion for even your smallest patients in various environments such as intensive care unit, emergency ward, as well as during intrahospital transport.

The HAMILTON-C1 neo offers:

- State-of-the-art invasive ventilation modes
- Synchronized noninvasive ventilation\*
- Demand-flow nCPAP modes\*
- High flow oxygen therapy\*
- SpO<sub>2</sub> and CO<sub>2</sub>\*\* measurement
- Leak compensation in every mode
- Over 4 hours of battery operating time and a weight of less than 5 kg
