

prunus

Sp3 Syringe Pump

Touch the future via infusion revolution

3.5" enlarged color touch screen for freely operation

"8+1" abundant infusion modes to meet various clinical demands

Easy installation improving clinical efficiency

Advanced technologies ensuring precise infusion

Dynamic Graphic Guidance

- ✓ Clear guidance to reduce operating errors

Dual-CPU Design

- ✓ Improving safely & eliminating risks of error

Intelligent Parameter Setting

- ✓ Adjustable ranges of monitoring parameters for safely

Pole-fixed/ Handheld/ Stack up

- ✓ Multiple fixation forms to fit in various clinical scenarios

Semi-enclosed Protection

- ✓ Protecting the syringe from external interference

Agile Tube Arrangement

- ✓ Three-stop design for tube fixation to achieve easy alignment

prunus

TMV Transfusion Pump

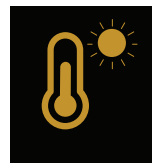

Fits in various scenarios

5" enlarged color touch screen for freely operation

"8+1" abundant infusion modes to meet various clinical demands

Internal heating to make infusion warmer and more comfortable

360° full-view alarm lamp facilitating prompt processing

±5%

✓ Advanced technologies ensuring precise infusion

Open-door Lighting

✓ Humanized design to make installation easier

Up and Down Pressure Detection

✓ Ensuring infusion safety from all aspects

Tube Fatigue Compensation

✓ Ensuring precision when long-time infusion

Auto-adapting Peristaltic System

✓ Perfectly matches the transfusion tube to maintain stable infusion

Dynamic Graphic Reminders

✓ Humanized guidance for the reduction of operation errors
