ABABIL

PEOPLE | PASSION | PRODUCTS

I ♥ Ababil

ABABIL HEALTHCARE PRIVATE LIMITED

DRIVEN BY PEOPLE, FUELLED BY PASSION, INSPIRED BY PRODUCTS.

DRIVEN BY PEOPLE, FUELLED BY PASSION, INSPIRED BY PRODUCTS

Our vision is to be the most admirable healthcare company worldwide.

Driven by People, Fuelled by Passion, Inspired by Products.

Welcome to Ababil Healthcare, where we're revolutionizing healthcare by delivering an equitable system and cutting-edge medical equipment. We empower doctors, nursing homes, and corporate hospitals with innovative solutions tailored to the dynamic healthcare sector. Our commitment to high standards in service, technology, reliability, safety, and cost sets us apart as a forward-thinking partner in this intricate landscape. Join us in pioneering transformative healthcare experiences where innovation meets compassion, and excellence becomes the standard.

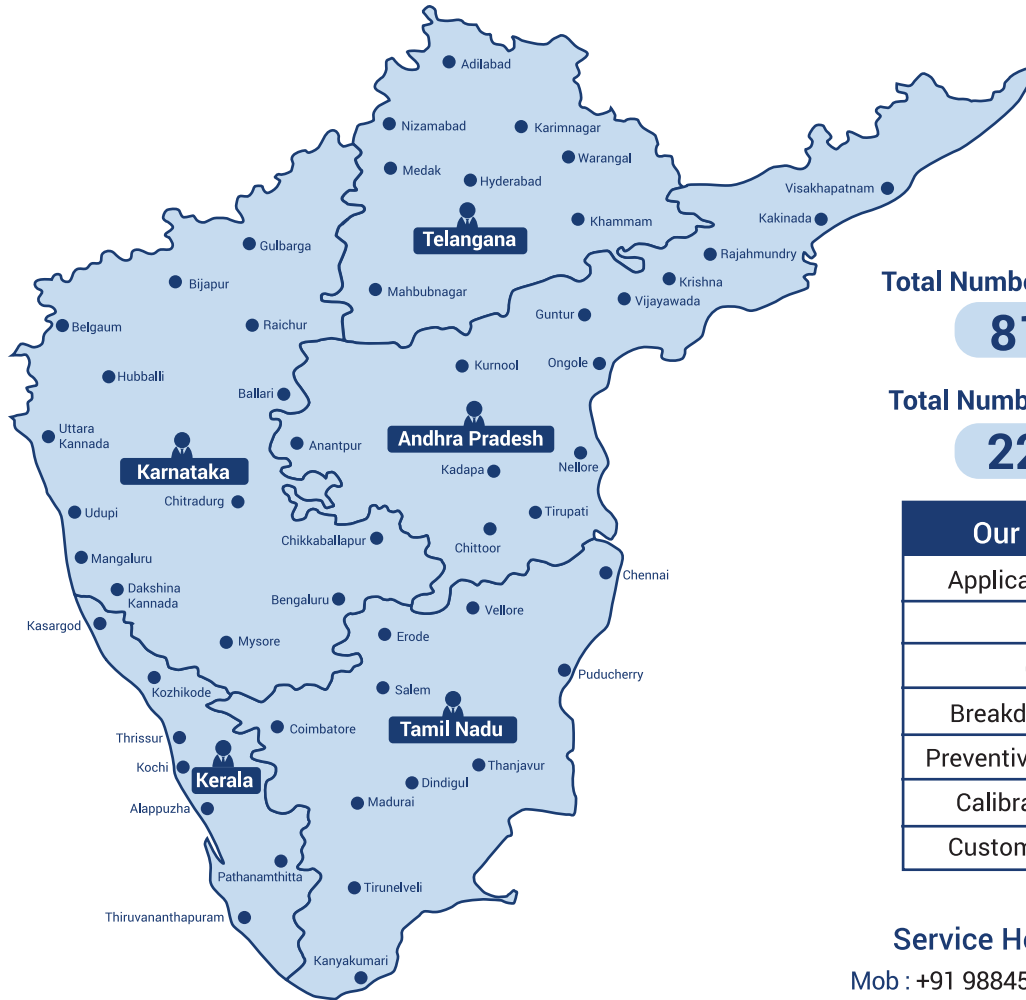

Mohamed Ibrahim
CEO of Ababil Healthcare

All Praise and Thanks to Almighty God

Mohamed's journey in Biomedical Industry began after he completed his B.E graduation in Biomedical Engineering in RGCE. Realizing the importance of business acumen, he decided to pursue a Post Graduation Diploma in Business Management from BIM, Trichy. Determined to broaden his horizons, he also became an alumnus of the prestigious IIM Ahmedabad, solidifying his knowledge and expertise.

Inspired by the challenges in Ababil Healthcare, he recognized a significant gap between the skills possessed by fresh graduates and the requirements of the industry. He believed that education should not only focus on theoretical knowledge but also provide practical skills and exposure to real-world scenarios. This realization led him to start Ababil Academy, an institution aimed at bridging this gap and ensuring that students were industry-ready upon graduation.

Services and Support

Services and support is the key to success for any organization in the healthcare industry. Here, at Ababil, we provide tailored services, support, and programs that aid all your employees and doctors use the equipment without hassle. So let us discover how our specialists can assist you in the everyday operation of your hospitals and fulfil their potential to craft both clinical value for patients and business value for the organization. Our team is committed to enabling uninterrupted, seamless operations and quick resolution of issues for minimum downtime.

ADVANCED BIOMEDICAL TRAINING

Program Contents

- ✓ Biomedical Engineering basics, Human Anatomy and Physiology.
- ✓ Overview of different types of equipment used in ICU & OT.
- ✓ Application and demonstration of various devices used in healthcare settings.
- ✓ Troubleshooting, repairing, calibrating, and performing preventive maintenance on medical equipment.
- ✓ Hardware training focusing on critical care and operating theater equipment such as ventilators, defibrillators, patient monitors, anaesthesia machines, electrosurgical units, and harmonic scalpels.
- ✓ Soft skill training to develop and improve interpersonal, communication, and emotional intelligence abilities to enhance personal and professional effectiveness.
- ✓ Training on quality and regulatory requirements to ensure the safety and effectiveness of medical devices and technologies.
- ✓ Hospital Biomedical Engineer training to prepare professionals to apply engineering principles and techniques to develop, maintain, and ensure the safe and effective use of medical devices and equipment in healthcare settings.
- ✓ Biomedical engineering career opportunities for growth, including roles in sales, service, research and development, regulatory affairs, and product management within the medical device and healthcare industries.

HAMILTON-C1 / C1 NEO

- ✓ ASV mode ventilation.
- ✓ Integrated pneumatic nebulizer.
- ✓ CPR ventilation.
- ✓ 4 h of battery operating time.
- ✓ Hamilton connect App.
- ✓ Adult, paediatric, and neonatal ventilation.
- ✓ Independence from compressed air.

HAMILTON-T1

- ✓ Approvals and certificates for use in ambulances, helicopters and airplanes.
- ✓ Adult, paediatric and neonatal ventilation.
- ✓ Independence from compressed air.
- ✓ Up to 9 hours of battery operating time.
- ✓ Advanced ventilation modes, including ASV® and INTELLiVENT® -ASV.

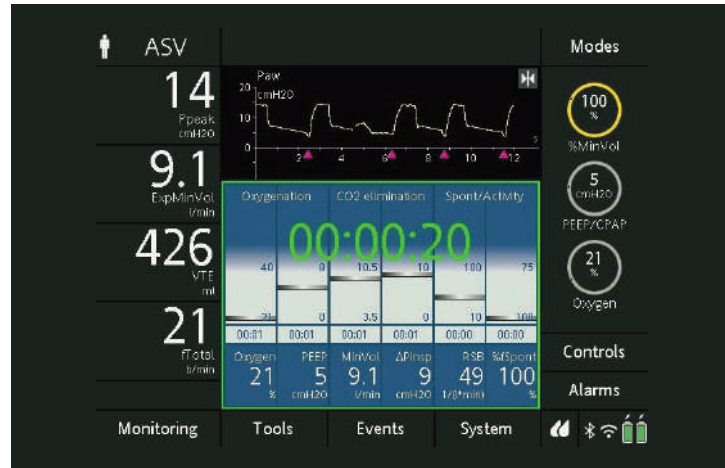

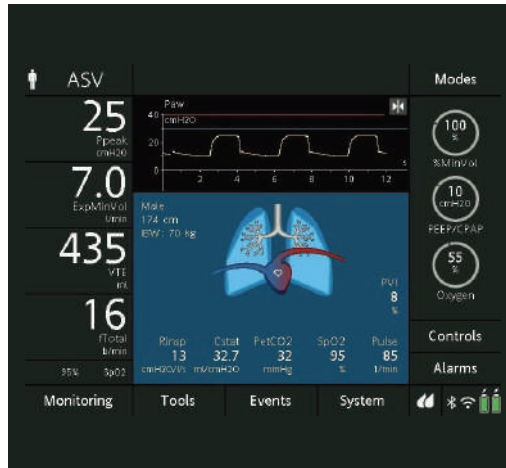

HAMILTON-MR1

- ✓ Comprehensive ICU Ventilator for use in the MRI department.
- ✓ Integrated teslaSpy gaussmeter.
- ✓ Independence from gas cylinders or compressors.
- ✓ Adult, paediatric, and neonatal ventilation.
- ✓ Up to 9 hours of battery operating time.

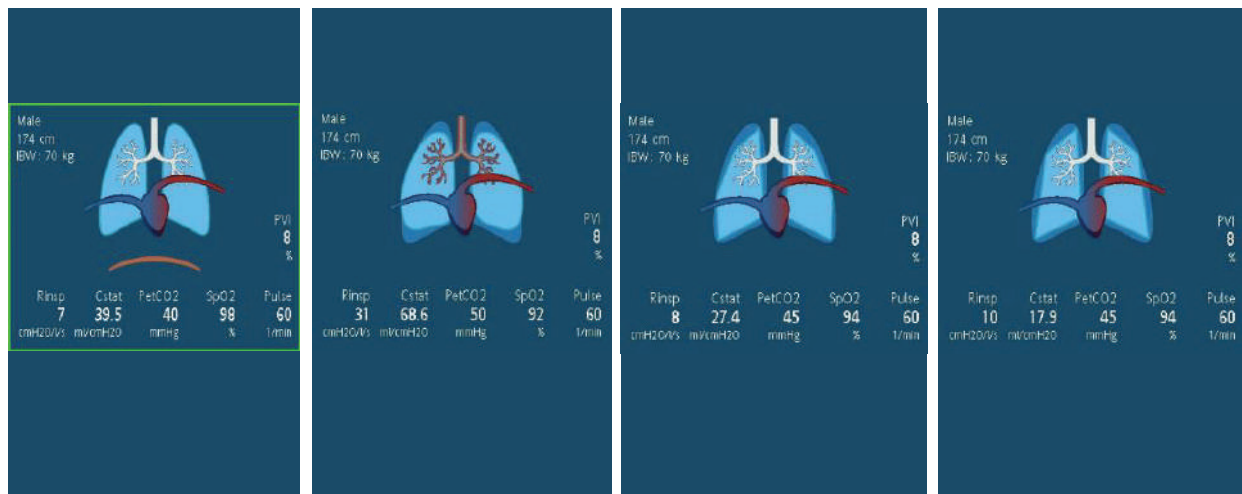

ASV

Vent View Status

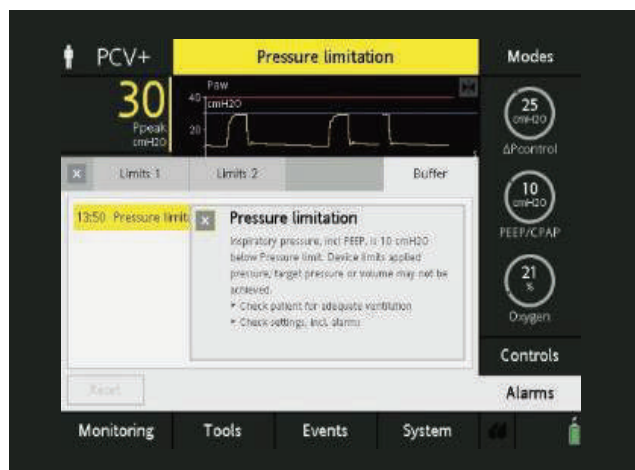

Dynamic Lung for Simplified Patient Monitoring

CPR Ventilation

On-Screen

HAMILTON-C3

- ✓ The compact high-end ventilator.
- ✓ Advanced ventilation modes including ASV® and INTELLiVENT®-ASV.
- ✓ Protective ventilation P/V Tool® pro for lung assessment and recruitment.
- ✓ Integrated high flow oxygen therapy.
- ✓ Dynamic lung for simplified patient monitoring.

HAMILTON-C6

- ✓ Independent air supply.
- ✓ Real-time synchronization with IntelliSync+
- ✓ P/V Tool® Pro for lung assessment and recruitment.
- ✓ Integrated high-performance turbine.
- ✓ On-screen help for alarm troubleshooting.
- ✓ This medical equipment's adaptability allows for trolley, pendant, head, or shelf positioning, providing unmatched versatility.

HAMILTON-H900

- ✓ Integrated temperature probe.
- ✓ Wall-heated, all-in-one breathing circuit sets.
- ✓ Adjustable temperature and humidity settings.
- ✓ Remote access to humidifier controls and status.
- ✓ Predefined settings for invasive, non-invasive and high flow.

INFIVISION ET 1000

Electrical Impedance Tomography

✓ A quick assessment of diagnosis and treatment

Infivision ET1000 provides quick assessment and bedside pulmonary ventilation and perfusion, with intuitive imaging to assist doctors in making diagnosis and treatment plans, offering timely guidance.

✓ Continuously monitoring

Monitoring changes in the condition and treatment effects throughout the process ensures continuous safety assurance.

✓ Individualized respiratory management

Individualized and precise treatment can provide more direct and timely guidance for accelerating the recovery of patients.

✓ Easy to use

The belt is easy to position and operates with simplicity. Image acquisition is rapid and intuitive, facilitating clear and immediate interpretation by healthcare workers.

Multiple Diseases

- ✓ Pneumonia
- ✓ ARDS
- ✓ COPD
- ✓ Pleural effusion-Hemothorax
- ✓ Pneumothorax
- ✓ Pulmonary embolism/Thrombolysis
- ✓ Pulmonary arterial hypertension
- ✓ Individualized PEEP titration
- ✓ Ventilation heterogeneity
- ✓ Assessment of lung recruitment maneuver
- ✓ Prone positioning
- ✓ Weaning
- ✓ Pendelluft
- ✓ Assessment of HFNC
- ✓ Perioperative respiratory management

Exclusive Technology

The world's pioneer in pulse wave perfusion imaging, which is contrast agent free and completely non-invasive.

Real Time

To see the pulmonary functional changes without any delay.

Non-Invasive

Ensuring safety, minimizing risks and enhancing patient comfort.

Radiation Free

Eliminates the risks associated with radiation, ensuring patient well-being with repeated use.

Functional Imaging

Functional imaging assists health workers in observing changes in medical conditions by visualizing pulmonary ventilation and perfusion alterations.

Bedside

Safeguard stands next to the patients, saving both cost & time.

Portable Design

Ultra-portable, easy to carry, ideal for on-the-spot ICU use.

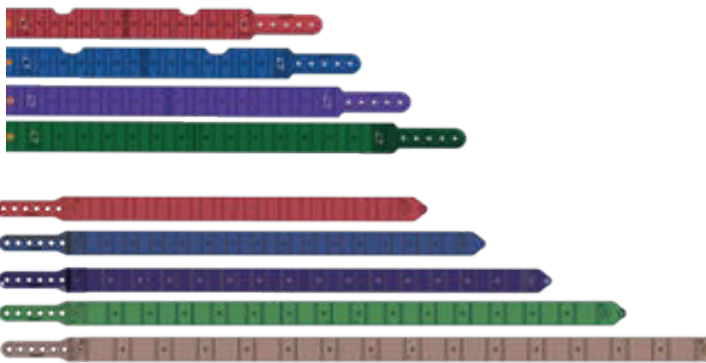

Facilitating Research

Supports data export and empowers in-depth scientific research by providing specialized data analysis software (ETSA), enabling comprehensive study and innovation in medical science.

Perfusion Imaging in Infivision ET1000

Diverse Analysis tools

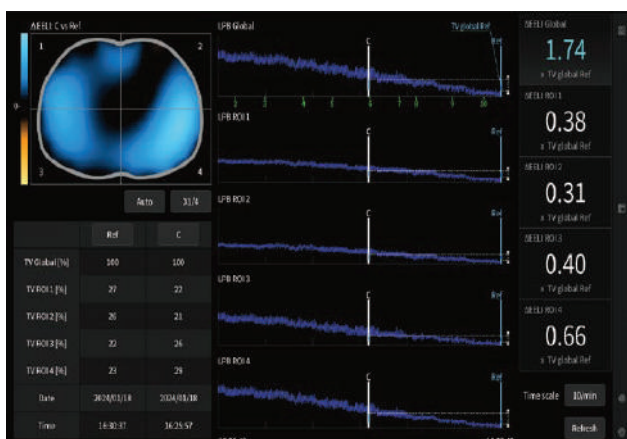

Main View (Main Veiw & Large Mode)

Provides several sections to help quickly assess key pulmonary function information which include:

- ✓ Continuous, dynamic images of ventilation and perfusion.
- ✓ Status images of overall and region-of-interest distribution of ventilation and perfusion.
- ✓ Display the numerical values or percentages for regional respiratory and perfusion impedance changes & display the ratio of the center of ventilation COV%.

Δ EELI View

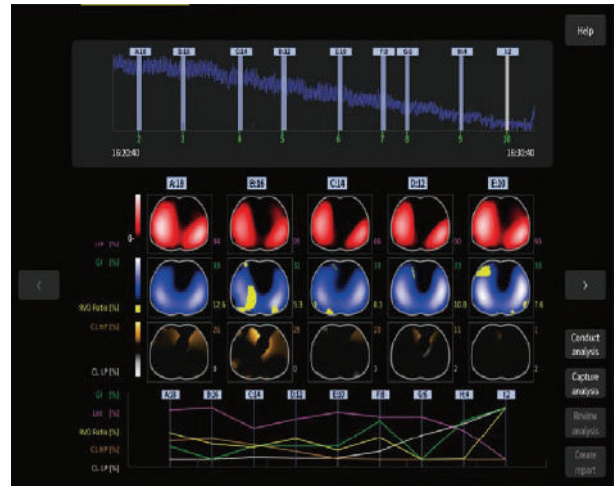

This view is used to assess the changes of End Expiratory Lung Impedance (Δ EELI) to

- ✓ Evaluate changes in Δ End-expiratory lung volume (Δ EELV) which reflect alterations in Functional Residual Capacity (FRC) (Ex-After modifying the Positive End-Expiratory Pressure (PEEP), applying recruitment maneuvers, or proning the patient).
- ✓ Aiding in the detection of possible recruitment of individual lung areas.
- ✓ Aiding in the detection of possible derecruitment of individual lung areas.

Analysis View

Allows the analysis of regional compliance changes and delays in regional ventilation in addition to the evaluation of ventilation & perfusion distribution.

- ✓ Automatically evaluate progressive and regressive PEEP adjustments to identify the optimal PEEP that effectively balances between over-expansion and collapse.
- ✓ Evaluate the potential for lung recruitment.
- ✓ Shows the correlation degree between ventilation and perfusion, based on impedance variation status images.

Match View

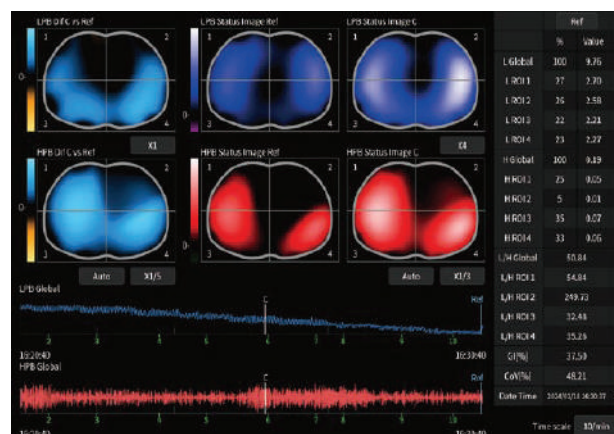

Facilitating research by giving more information such as MI (match index), DI (deadspace index), SI (shunt index) and related waveforms to observe and explore more.

Trend View

Compares the respiratory and perfusion images corresponding to any two given time points to

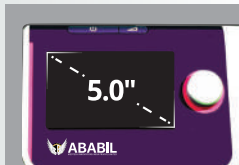

- ✓ Help to identify possible overdistension.
- ✓ To detect the onset of derecruitment during PEEP titration.
- ✓ Identify ARDS patients' response to a recruitment maneuver.

S1- CPAP & S2 - BIPAP

Precious and Elegance

5.0 inch enlarged screen design enable a better parameter review with climate control tube.

Inbuilt humidifier with preheat option (30min).

360 ° adjustable air outlet, suitable for various sleeping positions.

Flow range of 150L/Min.
Noise level less than 28 decimal.

Auto-fix algorithm

Inheriting the intelligent medical algorithm, the rhythm information model detection method established by tracking and learning the characteristics of the patient's change, learns the patient's change and continuously and automatically corrects it, accurately predicts the patient's trigger point, reduces the patient's confrontation, and increases the comfort of the patient.

P-Breath Home Breathing Cloud

Treatment data is available at your fingertips, meeting remote analysis and data intelligent management requirements.

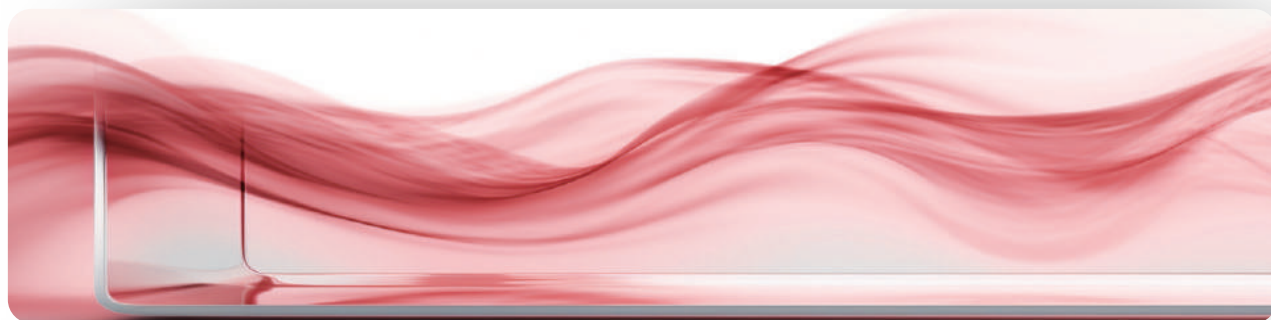

Wireless Spo2 module Interconnection

- ✓ Optional wireless Spo2 module for more comprehensive treatment.

Low Noise

- ✓ Operating under low noise for a more comfortable interactive experience, level less than 28 decimal.

- ✓ Automatic ramp
- ✓ Smart start and stop
- ✓ Automatic leakcompensation
- ✓ Intelligent heating
- ✓ Automatic screen off
- ✓ Automatic humidity

Boaray 600 Anaesthesia Workstation

- ✓ 15-inch color touch screen.
- ✓ 3 gas system with 6 tube rotameter.
- ✓ 2 vaporizer.
- ✓ Upgradeable for Masimo AGM.
- ✓ Displaying 4 waveforms.
- ✓ 2 loops and 20+ parameters on the same screen.
- ✓ Support SPO2 monitoring.

15 inch touch screen

600

Selling well in 150+ countries. OEM/ODM supports to 10+ internationally renowned anaesthesia machine

15 inch touch screen

Boaray 700 Anaesthesia Workstation

- ✓ Plug-and-play monitoring modules design.
- ✓ Digital flow meter.
- ✓ Support SPO2 monitoring.
- ✓ More high performance accessories are available, such as three gas sources, Penlon vaporizer, AGSS, ACGO, etc.

700

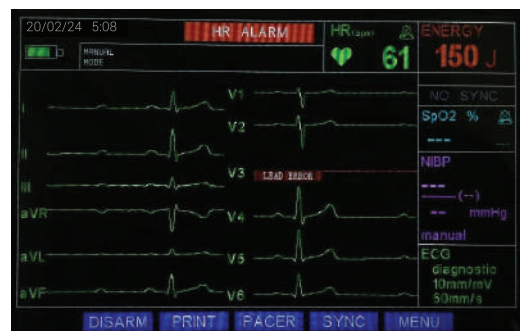

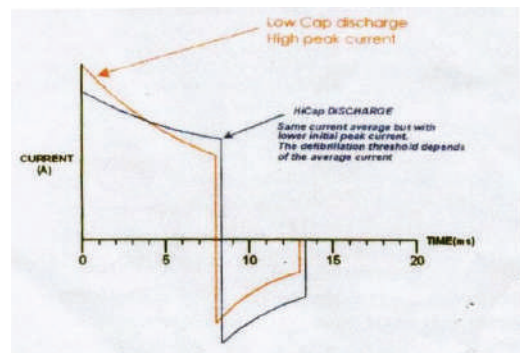

Double Vaporizer Positions

D7 - Defibrillator

- ✓ Biphasic Truncated Exponential waveform with HiCAP technology.
- ✓ 3 operation mode : Manual, Advisory or Semi-Automatic.
- ✓ Easy to carry, Just 5.5kg used for both Adult & Pediatric.
- ✓ High contrast 7" TFT LCD color display.
- ✓ Optional : SPO2, NIBP, Pacing.
- ✓ Internal memory up to 300 hours of ECG data.
- ✓ Battery -150 shock at maximum energy 230J.
- ✓ 250 minutes of pacing, or approximately 330 minutes of continuous monitoring.
- ✓ Self-Test Functionality: Regular self-testing to ensure operational readiness.
- ✓ Quick charging time - less than 6 sec for 230J with fully charged battery.

Surtron 400 HP / 200 HP

- ✓ Underwater cutting and coagulation.
- ✓ Double operational activity.
- ✓ Controlled cutting procedures.
- ✓ Double controlled coagulation procedures.
- ✓ Wide bipolar features.
- ✓ Argon compatible.

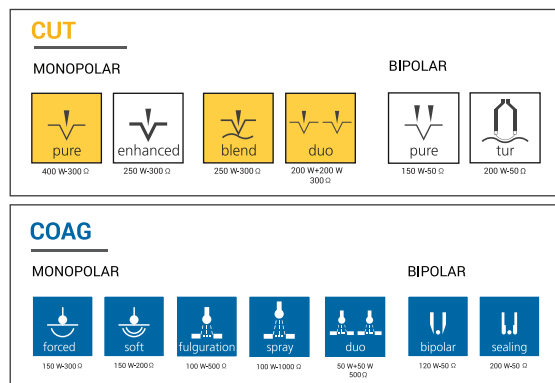

400 HP

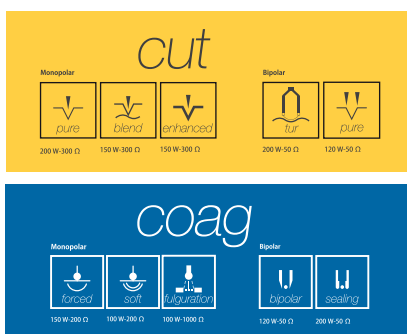

200 HP

Surtron 400 Touch

- ✓ The large 9" capacitive glass touchscreen display.
- ✓ Double simultaneous monopolar supply.
- ✓ Contemporary dual bipolar supply.
- ✓ Sealing vessel for closing vessels up to 7 mm.
- ✓ Cutting function under TUR saline solution.
- ✓ Memorization of working conditions.
- ✓ Integrated Argon unit.

200 Touch

Surtron 200 Touch

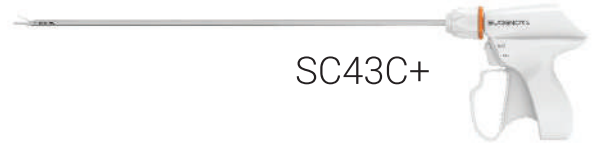

- ✓ High frequency electro surgical unit.
- ✓ User friendly.
- ✓ Vessel sealing function.
- ✓ Underwater bipolar cut.
- ✓ Split return electrode use allowed.
- ✓ Minimally invasive surgical treatment allowed.

SoniCure™ SC100E

Ultrasonic Scalpel System

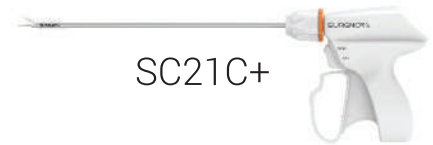

SC43C+

SC35C+

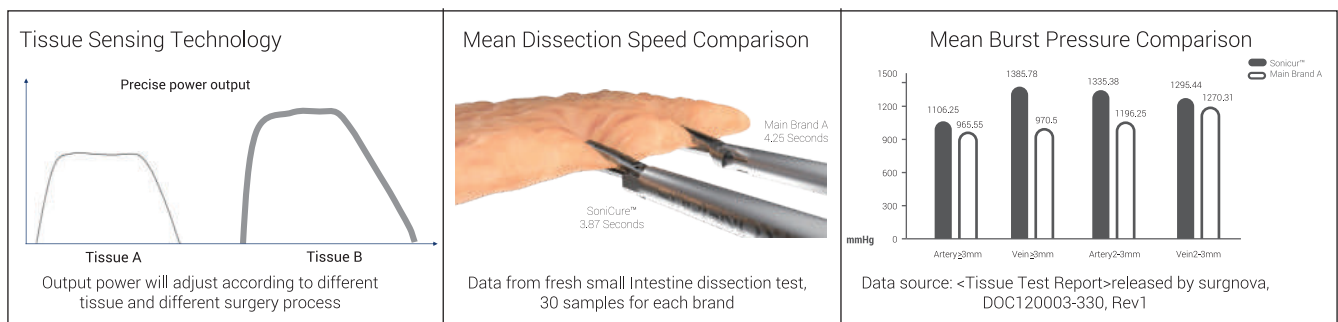

SC21C+

SC13C+

Model	Description	Shaft Length
SC13C+	Ultrasonic Scalpel System - Scalpel	13cm Open Surgery, Thyroid Surgery
SC21C+	Ultrasonic Scalpel System - Scalpel	21cm Open Surgery
SC35C+	Ultrasonic Scalpel System - Scalpel	35cm Laparoscopic Surgery
SC43C+	Ultrasonic Scalpel System - Scalpel	43cm Laparoscopic Surgery, Bariatric Surgery

- ✓ High speed frequency tracking technology.
- ✓ Indicated for sealing vessels up to 7mm in diameter.
- ✓ Superior dissection speed.
- ✓ Less thermal damage and more safety.
- ✓ Intelligent transection sensing technology.
- ✓ High-quality materials and design bring perfect performance and usability.
- ✓ Multiple scalpel sizes for open and laparoscopic surgeries.

P22/P18/P15/P12 Patient Monitor

Powerful | Pioneer | Practical

- ✓ Diagnostic gases CO₂, O₂, AG
- ✓ Respiratory Mechanics RM
- ✓ Integrates Module Frame with 6 Slots
- ✓ 12.1", 15.6", 18.5", 22" TFT LCD with Touch Screen
- ✓ CNS Activity Monitoring BIS, EEG, rSO₂
- ✓ Cardiac Monitoring 12 Lead ECG, ARR/ST, QT/QTc
- ✓ Monitoring NMT, TOF Neuromuscular Transmission

Seamless Transport

Monitoring the patient at every point of care
From outdoor to intra-hospital transport

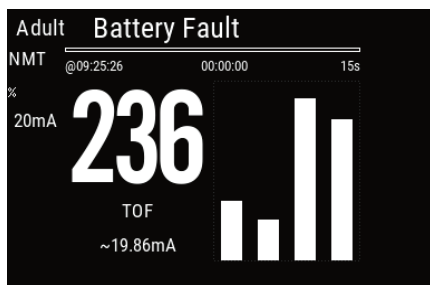

Just slide the P1 transport monitor into the patient monitor, the P series can implement the seamless transport from the outdoor, ambulance, operating room, ICU, to the recovery room.

Transfer Holder

Docking Station

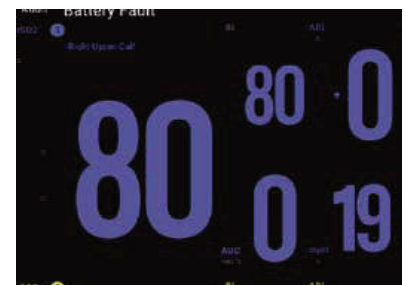

NMT (Neuromuscular transmission)

NMT helps in determining the depth or neuro cerebral perfusion.

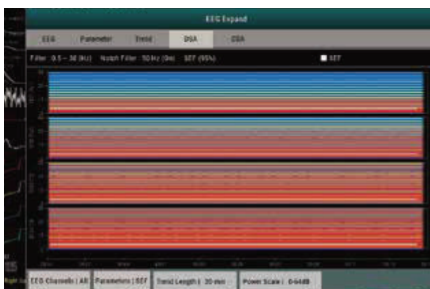

BIS (bispectral index)

Used to determine the depth of sedation or hypnosis.

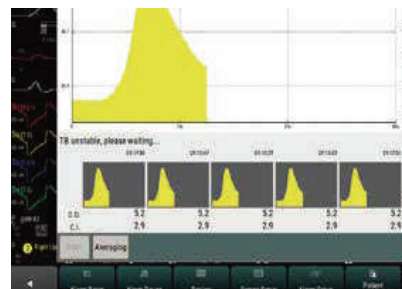

rSO2 (regional oxygen saturation)

a non-invasive method of directly measuring cerebral perfusion.

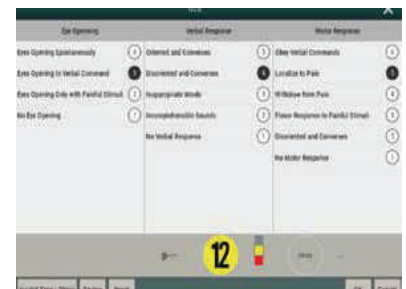

EEG (electroencephalography)

Used to determine changes in brain activity that assist in cerebral perfusion.

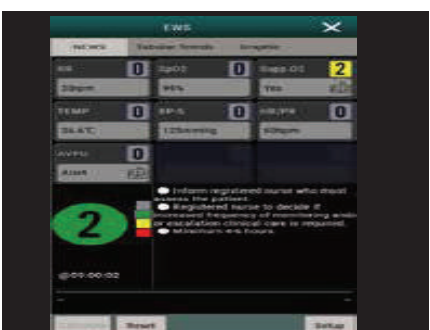

C.O. (Cardiac Output)

A gold standard to monitor the critically ill patient to ensure tissue oxygenation.

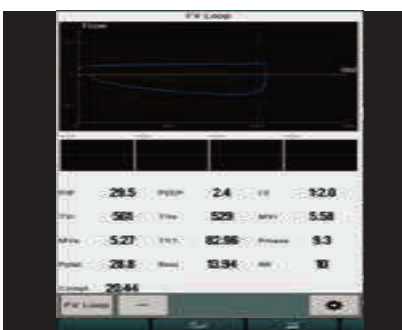

GCS (Glasgow Coma Scale)

Provides a practical method for assessment of conscious level in response to defined stimuli.

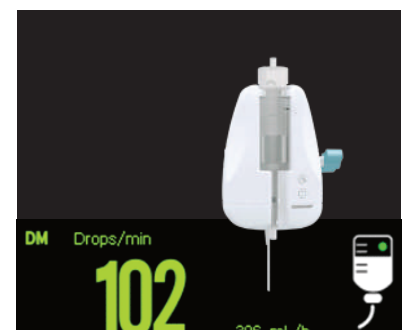

EWS (Early Warning Score)

Help identify early signs of deterioration and quickly determine the degree of illness.

RM (respiratory mechanics)

Help understand the ventilator/anesthesia machine operation and patient's respiratory function.

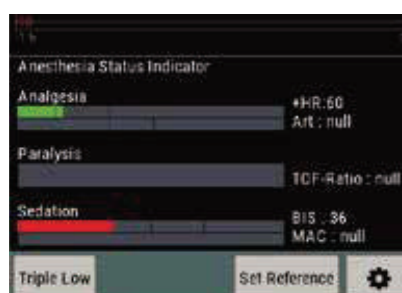

Unique Drip Monitoring

Make the intravenous infusion safer

BOA (Balance of Anesthesia)

Focus on relevant parameters over the course of the surgery.

Sepsis View

Help to score and guide the treatment of sepsis based on the latest SSC guidelines.

M12/M10 Compact Non-Touch Patient Monitor

- ✓ 12"/10" inch high-definition screen.
- ✓ Large capacity for data storage enables comprehensive review of patient's data.
- ✓ EWS & GCS available, Bed to bed review.
- ✓ 3kg weight, portable & convenient to move and vehicle carried.
- ✓ Various screen layouts for different clinical needs, such as 7-lead, large font, other bed, etc.
- ✓ Optional Drip Monitor.

S12/S10 Compact Touch Patient Monitor

- ✓ EWS offers real-time vital sign assessment for early condition detection.
- ✓ Glasgow coma scales (GCS) is crucial for precise neurological assessment, enabling better diagnosis.
- ✓ 12.1" & 10.4" inch full capacitive touchscreen.
- ✓ Optional mainstream/microflow CO₂, C.O. IBP measurement configuration.
- ✓ Drip monitor.
- ✓ Bed to bed review.

Drip Monitor

V6 Vital Sign Monitor

- ✓ Standard Configuration: NIBP, BLT digital SPO₂, PR, Lithium Battery.
- ✓ Option : Masimo SpO₂, Nellcor SpO₂, Micro-Stream EtCO₂, Instant infra-Red ear thermometer, Barcode Scanner, Touch Screen Covidien Filac 3000 Quick Oral Temp.
- ✓ FDA certificate approved.

E65 ECG Machine

E65

- ✓ 8-inch color widescreen LCD monitor, 12-channel synchronous display with the screen.
- ✓ Using the computer keyboard input and full-screen touch operation design.
- ✓ The use of high-definition low-noise thermal recorder, put the stack paper automatic positioning function, without human intervention.
- ✓ Support external USB printer, bar code scanner.

Handheld Patient Monitors

- ✓ M850 (ECG, SPO₂ and RESP).
- ✓ M860 (NIBP, SPO₂ and RESP).
- ✓ M880 (ETCO₂, SPO₂ and RESP).
- ✓ M800 (SPO₂-ADULT, PED, NEO).
- ✓ Easier to carry, easier to operate.

MP-30 Syringe Pump / MP-60 Infusion Pump

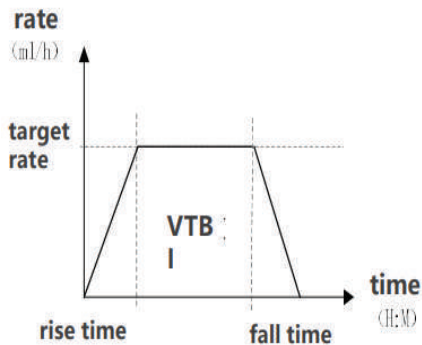

- ✓ Light weight (1.2) & Easy to Carry
- ✓ 2.4" touch medical grade display
- ✓ Optional Nurse Call Function, Lan Connection & WIFI
- ✓ 750 Pumps can be monitored in a single CMS
- ✓ 3-15 Pumps Docking Station in single power cord
- ✓ Data Monitored, Stored, Retrieve in CMS
- ✓ Titration Function
- ✓ 11 OCCL Level (225 mmhg - 975 mmhg)
- ✓ 7-Modes (Rate Mode, Time Mode, Weight Mode, Trapezia Mode, Sequence Mode, TIVA Mode, Micro Mode)
- ✓ 3-Bolus Mode (Manual Bolus, Rapid Quantitative Bolus, Automatic Bolus)
- ✓ 4 Type of Alarms (Near Finished, Nopower Supply, Reminder Alarm, Occlusion Level)
- ✓ CE | CE-FDA | GMP Certificate
- ✓ Relay Functions
- ✓ Drug Library Available
- ✓ Patient Recent Therapies
- ✓ Micro Mode for Safety Purposes in Neonates
- ✓ Variable KVO Settings
- ✓ Patient Data Entry, Barcode Scanner
- ✓ Variable Time Settings for Near-Finished Alarm
- ✓ Battery Backup -9 Hours
- ✓ Changeable Pressure Units
- ✓ Guide Rail Technology for Hight Accuracy
- ✓ Screen Amplifying Function for Big Fonts
- ✓ Syringe Size (5 ml to 60 ml)
- ✓ Digital Infusion Data History Management
- ✓ 20 Recent Therapies will be save in the machine
- ✓ Alarm can be enabled or disabled
- ✓ Maximum Information Display on Screen (Occlusion, Bolus, Purge, Battery)
